Hi All –

Just wanted to add in, it seems like the links are now down. I agree that this should not have moved into Done without sending a summary to the reporting partners (you all) and I've talked to the team about this, we will have that for the next one! Facebook doesn't tell us specifically when they take action sometimes so we just have to keep checking the links. I've asked the team to go write a summary for this incident, let us know if we can provide further help here.

Best,

(b)(6) [redacted]

Hey (b)(6) [redacted]

The platforms may or may not take action, and they sometimes take action without notifying EIP. "Done" is a signal to other EIP analysts that no more analysis needs to be done on their end at this time.

What we can be sure about at this stage is that Facebook have been notified, but nothing else it seems. EIP will periodically re-check the link to see if the content has been removed and will update the ticket if it has. Facebook may also be investigating the misinformation and may update the ticket itself if an action is taken.

Best,

(b)(6) [redacted]

Hey, (b)(6)

Just wanted to check on this to understand the process. I get why the analysis is complete, but should it be marked as done if we haven't yet heard back from facebook?

Thanks,

(b)(6)

Reply above this line.

(b)(6) commented:

Analysts at the EIP looked for cross-platform spread of this post, including in local media, but it appears contained to Facebook at this point.

The issue has been raised with Facebook to see if additional steps can be taken on the platform.

(b)(6) changed the status to Analysis Complete.

tomwi resolved this as Done.
